USER INTERFACE DESIGN

EXPERIMENT 9: Design Input Forms with Validation using HTML, CSS and JavaScript

NAME: Jaishuriya J

REG NO: 240701200

AIM:

To design input forms that validate user data such as email address and phone number, and display appropriate error messages using HTML, CSS and JavaScript.

PROCEDURE:

Step 1: Creating the HTML Form

Created an HTML form containing the following input fields:

1. Email Address
2. Phone Number
3. Submit Button

Used elements to display validation error messages.

Step 2: Styling the Form using CSS

Applied CSS styling to improve the appearance of the form:

- Center aligned form container
- Background color
- Padding and border radius
- Styled input boxes

- Green submit button
- Red error messages
- Responsive layout

Step 3: Adding JavaScript Validation

Used JavaScript to validate user inputs when the Submit button is clicked.

Email Validation:

Checks whether email contains:

- Username
- @ symbol
- Valid domain like .com

Phone Number Validation:

Checks whether:

- Contains only digits
- Has 10 digits length

Step 4: Displaying Error Messages

If invalid input is entered:

- Invalid Email → Displays red error message
- Invalid Phone Number → Displays red error message

If both are valid:

- Displays success message.
